

How Many Ways Can You Make It?

Think about a number you like between 20 and 100.

Show three different ways to add numbers that make your number. Write the addition sentences and draw pictures or use words to explain how you made each one. ([Outcome](#), [Understanding](#))

Where to start

- What number did you pick?
- Can you add two numbers to make it?
- Can you add three numbers to make it?
- Did you use tens to help you?
- Is there another way to make the same number?

Stretch

Can you find four numbers that add up to your number? Does the order you add them in change the answer?
