

Addition and Subtraction Maze

In Grade 2, students investigate addition and subtraction within 100 ([Outcome](#)). This maze game lets you practise solving addition and subtraction problems while you find your way from start to finish. Each step you take through the maze is one correct answer ([Details](#)).

How to play

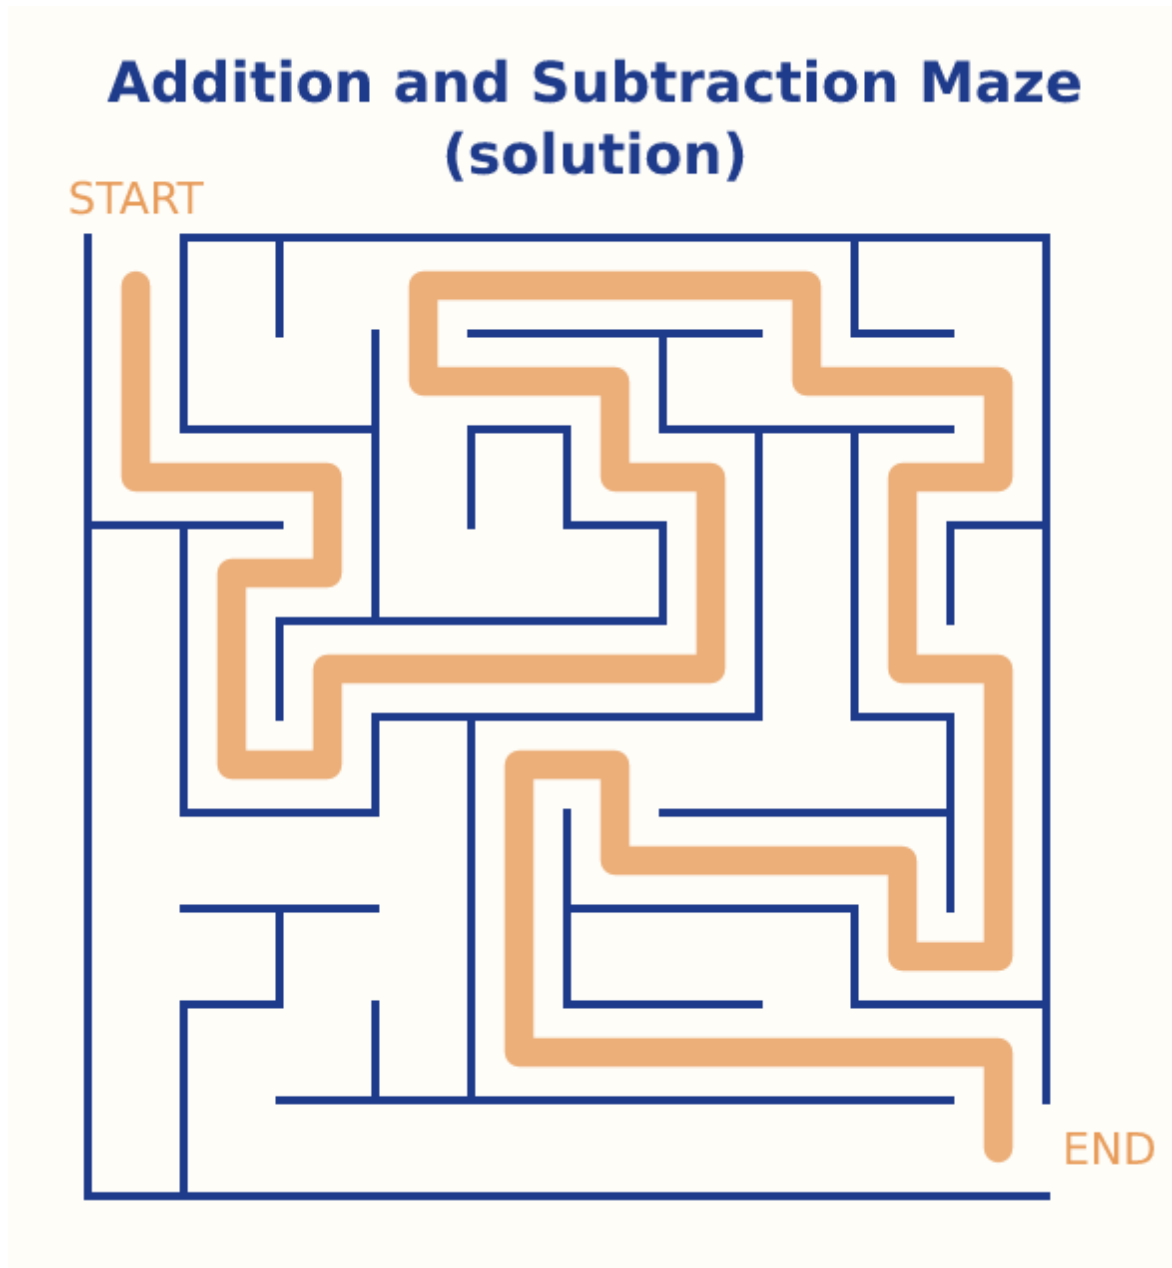

Start at the entrance marked with an arrow at the top left. Draw one path through the open corridors to the exit at the bottom right. Do not cross any walls. When you reach the exit, check your path against the answer key to see if you solved every problem along the way.
