

Living Systems: Plants and Animals Word Search

Plants and animals interact in many ways. They live in different habitats and depend on each other for food. A food chain shows how plants and animals are connected. Animals use their senses to find food and survive. Some animals are carnivores that eat meat, while others eat plants. We can all take actions to protect plants and animals in our communities ([Outcome](#), [Details](#)).

How to play

- Find the 8 words from the list in the grid (11 × 11).
- Words run across, down and diagonally.
- Circle each word you find and tick it off the list. The answer key shows where every word hides.

Words to find

- ANIMAL
- CARNIVORE
- CHAIN
- HABITAT
- PLANT
- PROTECT
- SENSES
- SURVIVE
